The Prototype For Cutting Material Management

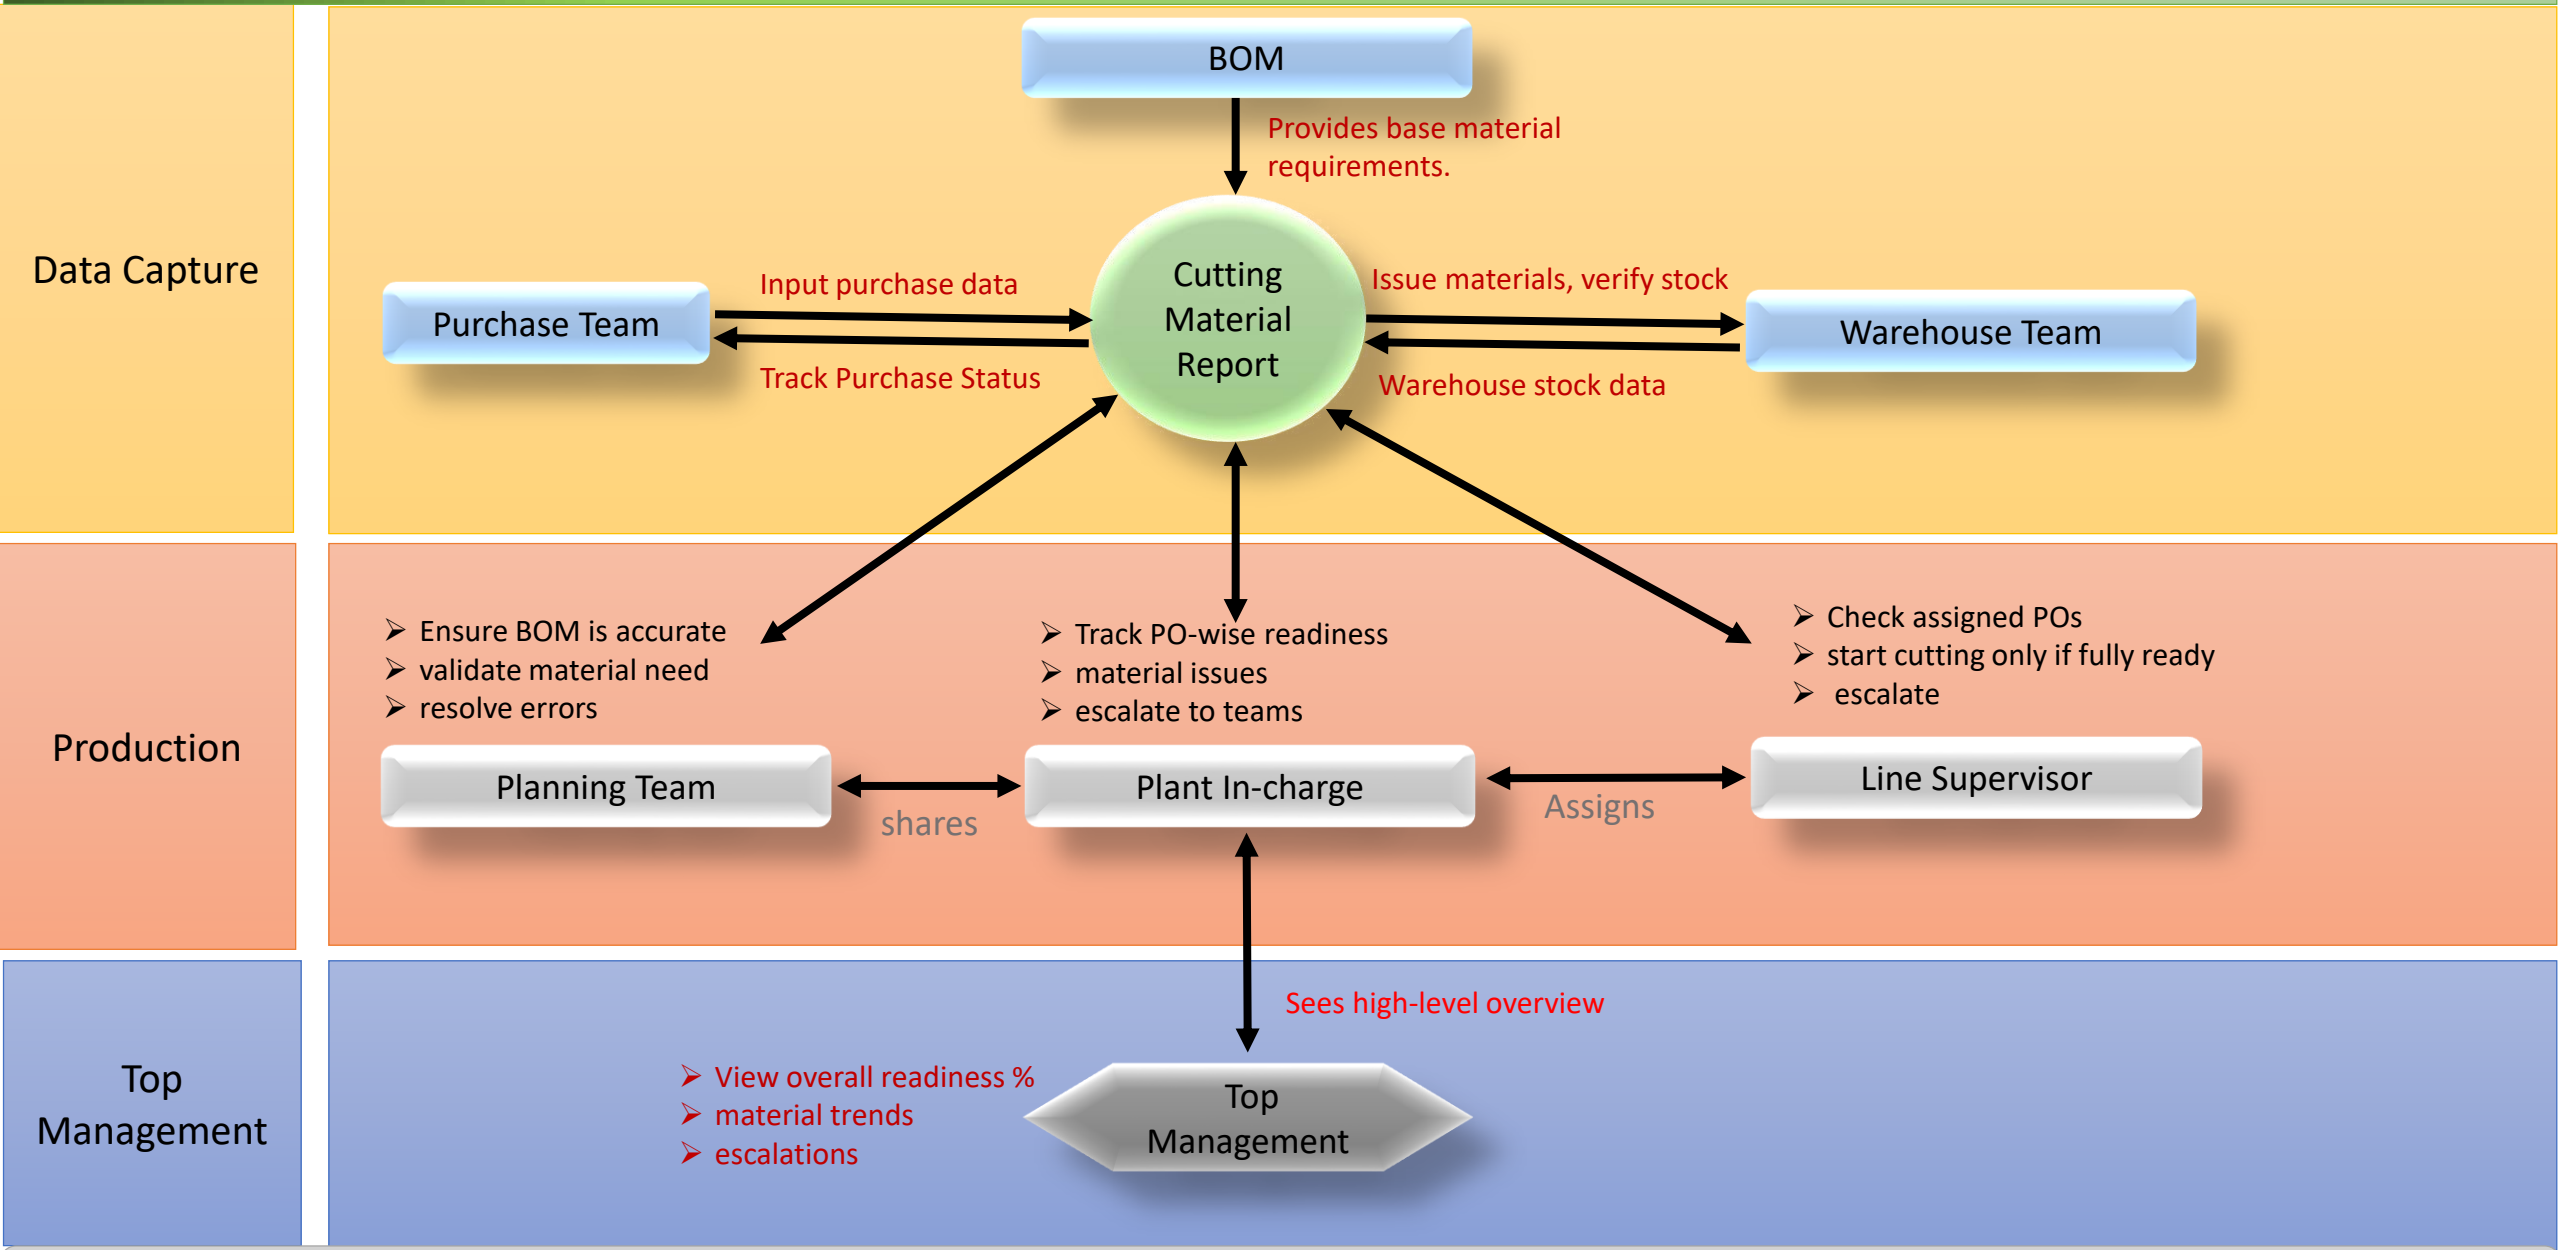
Report Presented

Presented by : Manohar-G (APC-IT)

2025 July 19

APACHE

Organizational Workflow for Cutting Material Monitoring



Cutting Material Report auto-syncs BOM,PURCHASE, WAREHOUSE, PLANNING AND PO DATA| Triggers alerts and tracks material readiness

Key Responsibilities For Cutting Material Management Report

Pull BOM

BOM Department – Enhancing Accuracy and Efficiency :

1 . Ensure Accuracy in BOM Pulling
2 . Create BOM Based on Actual Article Usage
3 . Avoid Unnecessary Material Creation

Purchase Department

Purchase Department – Ensuring Timely and Aligned Procurement

1. Procure Based on Finalized BOM Requirements
2. Monitor Material Lead Times Proactively
3. Avoid Over-Purchasing or Excess Inventory

Warehouse Department

Warehouse Department – Maintaining Data Accuracy and Stock Readiness

1. Ensure Accurate Stock Data Maintenance
2. Fetch and Share Stock Data Correctly
3. Support Cutting Material Availability Checks

Planning Department

Planning Department – Driving Accurate Schedules and Coordination

1. Maintain Accurate Planning Data
2. Update Schedules Promptly
3. Coordinate Closely with Other Departments
4. Escalate Issues Proactively

Production

Production Department – Ensuring Smooth Execution and Timely Output

1. Follow Updated Cutting and Production Plans
2. Communicate Line Stoppages Immediately
3. Track and Share Real-Time Progress

Cutting Material Availability – Line Supervisor

Day	2025/07/05	PO NO	All	Status	All	Line	All

Assigned Pos	Ready to Cutting	Not Ready	Escalated
5	3	1	1

PO Readiness List

Day	Line	PO NO	Article	Material Status
2025/07/05	AP11CO5	1000042525	Samba	✓ OK Check
		1000042579	Samba	✗ Short Check

Material Checklist by PO

PO NO 1000042579

By default the field takes short material status po in ascending order

PO NO	Article	Material	Material Name	Required Qty	Available Qty	Shortage Qty	Status	Invoice	ETA
1000206709	Samba	M001	Material 1	125	125	0	✓ OK		
1000206709	Samba	M002	Material 2	520	300	220	✗ Short	INV-MAT-20240620-0048	2025/07/05

Raise Escalations

Cutting Material Availability – Plant In-charge Dashboard

APACHE

Date Range	2025/07/01	Plant	All	Line	All	PO NO	All	Status	All

Total POs Today	Fully Ready Pos	Shortage Pos	Delayed Pos
28	19	7	2

PO-Wise Material Readiness Status

Date	PO NO	Model	Plant	Line	Material Readiness %	Status	Delay	Action
2025/07/02	1000042579	SAMBA	AP11	AP11C02	100%	✓ Ready	-	Start Cutting
	1000042525	STANSMITH	AP10	AP10C04	75%	✕ Short Check	1 DAY	Escalate
	1000215486	ULTIMATE	AP09	AP09CO3	90%	⚠ Partial		

Material Shortage Tracker

Material Name	Required Qty	Available Qty	Short Qty
Fabric A	200m	160m	40m

Purpose: Core operational view—monitor each PO's readiness at the line level and Material-wise breakdown of what's short and how many POs are impacted..

Benefits : Take immediate steps for POs with issues and Communicate to purchase team or prioritize allocation from existing stock.

Cutting Material Availability Dashboard – Plant In-charge Dashboard

APACHE

Critical Escalated Pos :

PO NO	All	Plant	All	Status	All	Submit

PO NO	Plant	Shortage	Delay	Escalated To	Status
1000042525	Plant B	Fabric A	3d	Planning Team	⚠ Pending
1000042579	Plant E	Material 2	2d	Purchase Team	✓ Resolved
1000042587	Plant H	Material 3	6d	Warehouse Team	✓ Resolved
1000042592	Plant K	Material 4	1d	Planning Team	✓ Resolved
1000042466	Plant F	Material 9	5d	Purchase Team	⚠ Pending

Purpose: Highlight urgent POs that are delayed due to material unavailability and require attention.

Benefits : Spot improvement or decline in readiness over time. A dropping trend might signal deeper issues in supply or coordination.

Explanation For KPI Cards

Purpose: Give an instant overview of today's key metrics

KPI	Description
Material Readiness %	% of POs for which all required materials are 100% available. Shows overall cutting readiness.
Open Escalations	Total number of escalated cases (shortage or delay) not yet resolved. Reflects risk and follow-up need.
Total POs Today	Number of POs scheduled for cutting today. Shows daily load.
Average Delay	Average days of delay for POs with shortages. Helps GM assess the severity.

Benefits : Quick health check of plant's material readiness and performance for the day.

Cutting Material Availability Dashboard – Top Management

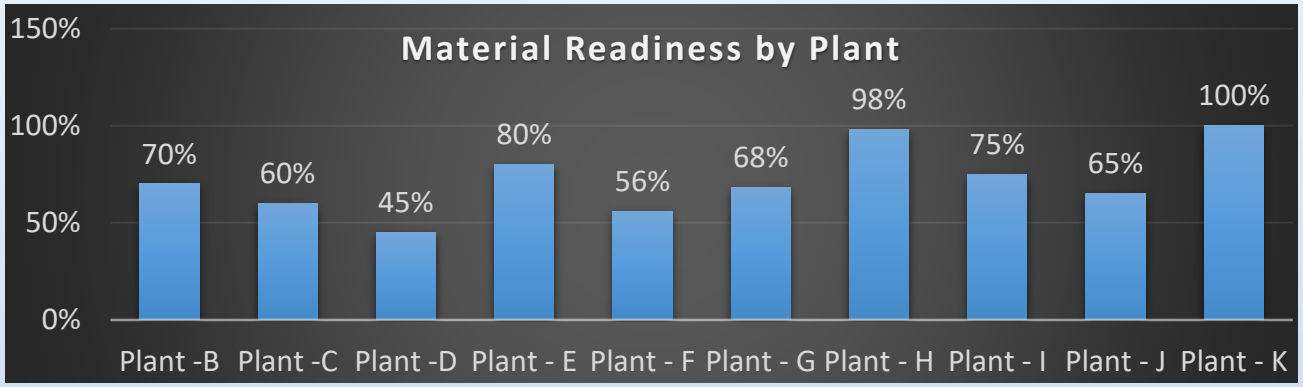
Date Range	2025/07/01	Plant	All	Line	All	Submit

Material Readiness %
82% Ready

Open Escalations (issues not yet resolved)
5

Total POs Today
36

Avg Delay
2.1 days



Purpose: Compare different plants to see which ones are better prepared for cutting.

Description : Shows % of material availability across all assigned POs

Benefits : Identify which plant is performing well and where attention or escalation is needed.

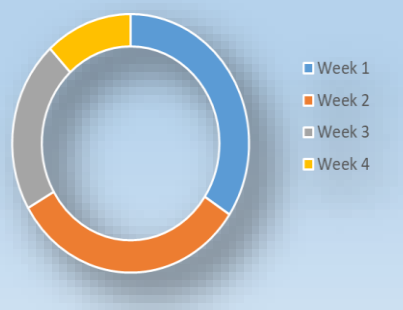
Top 5 Short Materials :

Material	Short Quantity	Affected Pos
FTWR WHITE 01F7 54	340m	3
1.4MM ECO SOFT MATTE	220m	8
CEMENT TWICE	165m	21
WHITE LATEX	100m	4
ST-A990-06E EPM5 MESH	92m	1

Purpose: Highlight the most frequently short or unavailable materials, across all POs.

Benefits : Quickly identify which raw materials are causing the biggest disruptions—helps guide procurement priorities

Cutting Availability Trend (Weekly) (Line Wise)



Purpose: Visualize the trend of material readiness over time

Benefits : Spot improvement or decline in readiness over time. A dropping trend might signal deeper issues in supply or coordination.

Mail Escalations And WhatsApp Escalations

Escalation Type	Trigger Condition	Target Department	Medium
Material Shortage Alert	Required material not available in stock & no PO before CRD	Purchase, Warehouse	Email, WhatsApp
Delayed PO Delivery	PO delivery date exceeds CRD or cutting plan date	Purchase	Email, WhatsApp
Cutting Plan at Risk	Material not ready 2 days before scheduled cutting	Planning, Production	WhatsApp
Line Stoppage Notification	Production halted due to missing material	Planning, Purchase, Warehouse	Email
Material Fetch Delay	Material request issued but not fetched from warehouse	Warehouse	WhatsApp
Schedule Escalation	Cutting not started on planned date	Planning	Email

Track Material Readiness Flow For one PO

1 Schedules are uploaded **late in SAP**, which leads to misalignment with production CRD.

2 There is a discrepancy between the actual schedule dates followed in production and the schedule dates maintained in SAP, leading to misalignment in material planning and execution.

3 There is a discrepancy between the actual schedule lines followed in production and the schedule line maintained in SAP, leading to misalignment in material planning and execution.

schedule used in production	Schedule uploaded in SAP	Sales Order	CRD	Actual Line	Line in SAP	Order Quantity	Schedule Qty In SAP	Actual schedule Qty	Material Process	Cutting Qty	FG Qty

Actual Schedule For re schedule POs

1. Schedules are uploaded **late in SAP**, which leads to misalignment with production CRD.
2. There is a discrepancy between the actual schedule dates followed in production and the schedule dates maintained in SAP, leading to misalignment in material planning and execution.
3. There is a discrepancy between the actual schedule lines followed in production and the schedule line maintained in SAP, leading to misalignment in material planning and execution.

schedule used in production	Schedule uploaded in SAP	Sales Order	CRD	Actual Line	Line in SAP	Order Quantity	Schedule Qty In SAP	Actual schedule Qty	Material Process	Cutting Qty	FG Qty
06/01-06/07	05/20-06/07	1000225437	2025/06/07	K3,5	AP7C02	420	420	420	Not OK	420	290

Find out Issues While Material Tracking For schedule POs

➢ BOM Created but No Purchase/Fetching :

- Materials: 4040402339, 4040402288
- Root Cause: BOM planned but purchase not triggered, leading to delay in production readiness.

➢ Purchase Done but No Fetching Info / Issues in Fetching :

- Materials: 3100195232
- Root Cause: Purchase completed, but material not fetched or errors in issuance (highlighted in red).

➢ Very High Total Dosage Quantity :

- Material: 4040708467 (26,865.200 dosage for just 951.129 requirement)
- Root Cause: Likely a BOM error—dosage quantity too high for the required qty. Needs rechecking of BOM accuracy.

➢ Delay In Fetching Issue Process :

- There is a delay in the fetching process — fetching is being done two or more days after the creation date, which affects timely material availability and process flow.

➢ Purchase Delay :

- For some pos , the cutting quantity has been fully completed; however, procurement for certain materials associated with these POs is still pending.

➢ Reschedule Pos :

- Rescheduled pos and notice pos are also not yet updated in the SAP system.

➢ Purchase Excess Quantity :

- Purchasing excess quantity for some materials

Material Tracking For schedule POs

Material Tracking For schedule POs

For automatic cutting process materials — indicating BOM accuracy, successful purchase alignment, and timely fetching. All process checks passed successfully but difference between fetching creation date and fetching issue date.

Sales Order	Material	Total Dosage Qty	Requirement Qty	Allocated Qty	Purchase Qty	Fetching Number	Material Fetching sheet	Required Qty	Issued Qty	Un-issue Qty	Fetching create date	Fetching Issue Date

MPS

Purpose of MPS

- ✓ MPS is designed to **automate production planning**.
- ✓ It collects **all order information**, processes it, and **schedules production line-wise and article-wise**.
- ✓ The goal is to improve **efficiency and visibility** in planning.

Why MPS is Not in Use Currently

- ✓ The current MPS system **creates excess production schedules**, leading to:

1. Overproduction
2. Misalignment with actual order requirements
3. Confusion at the execution level

- ✓ These issues caused **delays in the production process**.

APE Team Involvement

- ✓ The APE Team has been **informed about the issue**.
- ✓ They are currently **working on modifying and correcting** the MPS logic.
- ✓ Timeline for resolution is still **under discussion**.

Temporary Action by Planning Team

- ✓ Until the MPS tool is stabilized:
- ✓ The Planning team is using **SAP** directly to execute and manage production schedules manually.
- ✓ This ensures **more control and accuracy**.

Thank you

Adapt it with your needs and it will capture all the audience attention.
